All websites use a web address, or a URL.
The end of a website (.com, .net, .gov) are called
“domain names.”

Examples:

Facebook.com

Isd622.org

Comcast.net

Healthcare.gov

Domain names like .gov, .edu, and .org are typically more trusted than websites with domains like .com or .net.

Related Vocabulary

Icon

An icon is a symbol which usually represents a computer program, computer file, folder, or an action for a program to do. Icons are usually small pictures.

Examples:

Link

A link (sometimes called a hyperlink) brings the user to data by clicking or tapping. Typically links bring the user to another website.

Examples:

In advance of the kick-off meeting, please:

1. read and initial the memorandum of understanding in this Google doc: https://docs.google.com/document/d/1BA94RehVApmCXXKIDYMfx_4oOOyU77A1VnwuX_ryqHec/edit#slide=id.g11a2c1da02_1_54
2. review [this blog post](#) that describes our philosophy for usability and accessibility, and
3. request a new Moodle site [using the request form](#)

Website

A location connected to the internet that provides information or data, including things like social networks, and online shopping.

Examples:

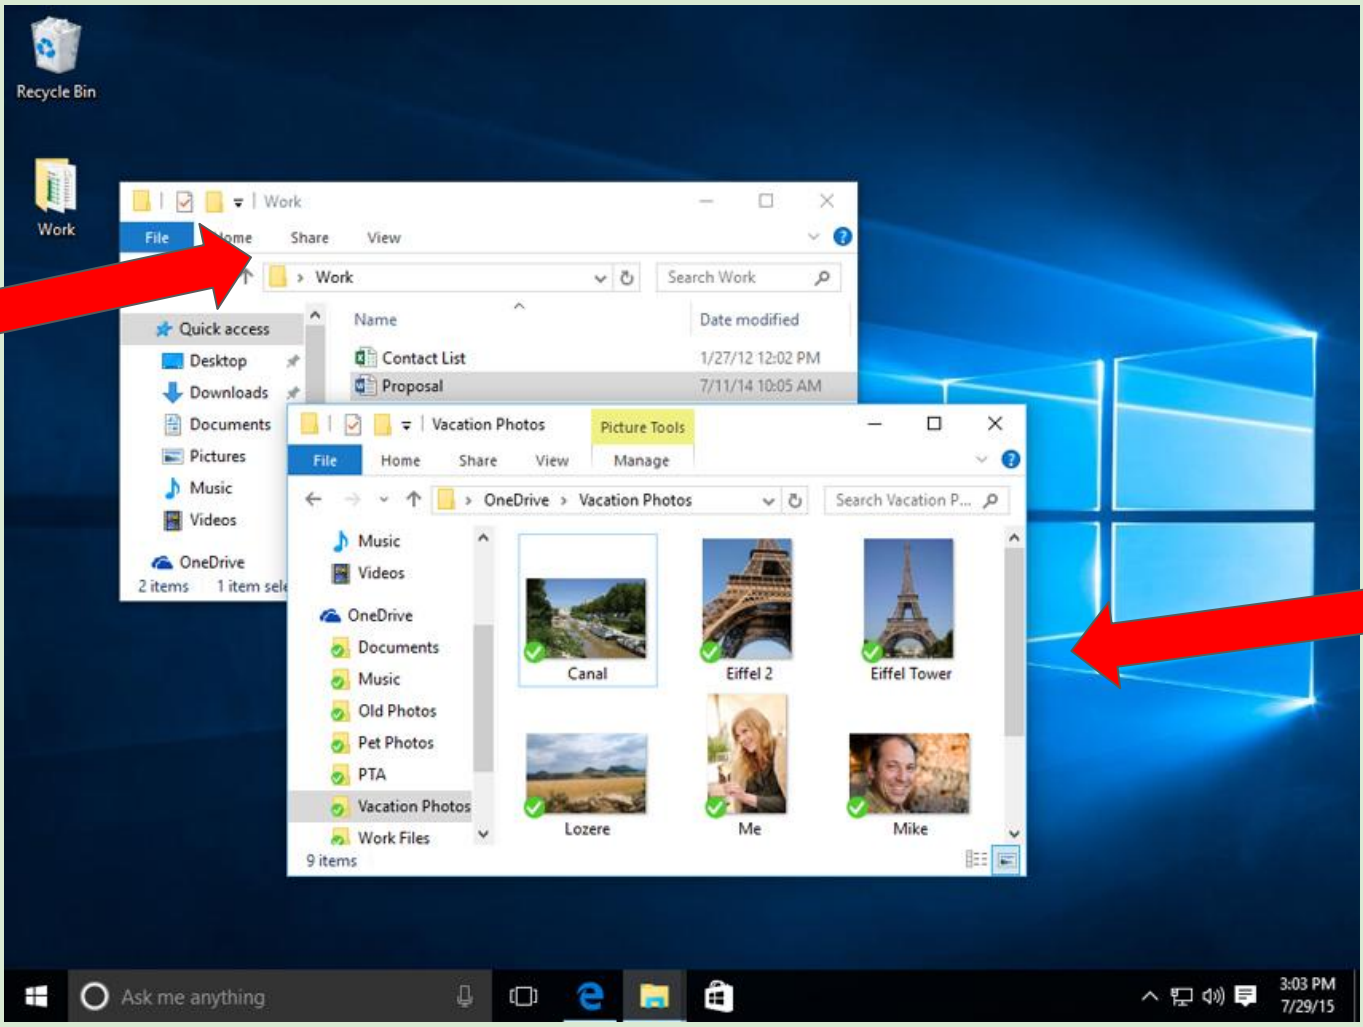

Facebook.com, ISD622.org, benefits.gov

Window

A window is a viewing area on a computer display screen. Windows are the container for computer programs. All computer programs are contained and viewed within a window.
